FTC Market Survey #10

There are thirty (30) cigarette brands reported in the Federal Trade Commission Market Survey #10 that met the New York City Tax Specifications (17 mg tar and 1.1 mg nicotine) which are listed in Table I. Also, there are seven (7) other brands that met the tar specifications and eight (8) other brands that met the nicotine specifications. These are also listed in Table I.

The brands listed in Table II are those which because of increases in tar or nicotine deliveries in Market Survey #10 did not meet the New York City specifications.
